

2020 PEOPLE FOR BIKES – PLACES FOR BIKES CITY RANKINGS

NWA retained three cities in the top 20 although Bentonville dropped out and was replaced by Bella Vista. Bentonville increased its score in Ridership and Network but saw decreases in Safety and Acceleration with the biggest drop being in the Reach category. The Reach score is based on demographic data to understand the differences in access and connectivity for traditionally underserved populations compared to the whole city. After further review, the calculation for “Demographic gap in BNA” is shown as “data unavailable” and thus greatly affected the score. We are reaching out to PFB to understand why this is the case as we believe this is what caused it fall out of the top 10.
